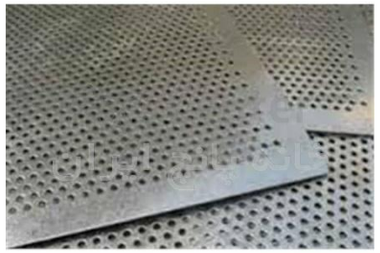
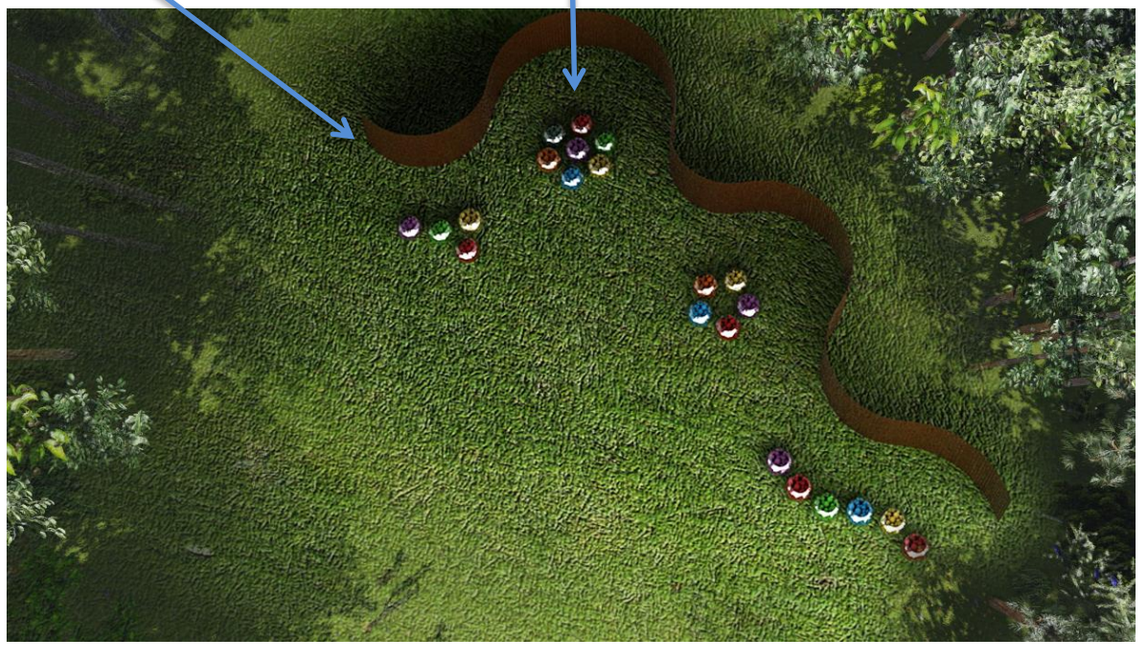
Let’s design the wall

The main role of children in the garden:
Children’ satisfaction and contribute to the intellectual development of them is very important. The main priority of the project is to create a suitable and happy environment, and where is suitable for children will be spectacular for adults too. So have the consent of the both.
Communal activity:
Children accompanied by their parents and other visitors are shared in a social activity to form the garden space.
Constructing or not Constructing:
This project with the aim of creating an space for exciting, innovation and freedom of actions ignored any particular construction. And just wants to gather the people around with the minimum facility to create a beautiful an creative environment.
In this garden, at the end of the festival, we will see a wall with a specific design done by visitors.

Elements used in the garden:



A wall which is made of perforated recycled metal sheets


Bottle cap for making shapes,
With some holes created on them.
And wire for installation bottle caps on the wall
