

## A letter to God

**Keywords:** Construct together

**Materials:** some stones (made from polystyrene), some wooden sticks (some bamboo sticks, these bamboo sticks are used for the predictions, for predicting the fortune in future. People warn their behaviors, or make wishes in these special ways).

**Size:** flexible sizes according to the reality.

We could find a lot of heaps of different sizes of stones in Tibet, we could find many small branches inserted in caves, and we call it “to support the mountain”.

There is a lot of letters written by human beings in the crevices of wailing walls in Mecca. These phenomena have condensed the people’s wishes, ideas and hopes.

They are searching for the sense of identity which is related to the fortune of times and individuals.

This is a letter to God.

**Works Description:** Pile a heap from small to large. We pile it through the help of wooden sticks. Those wooden sticks represent a kind of Luck.
