

TALK TO ME HEAR ME !

Making friends is that we talk, listen and respond to each other, and we feel connected. So can also we talk with plants, listen to them, to make friends not only between human and human, but human and plants, nature, and the world? The design uses megaphones as a media to provide a playscape for adults and children to communicate with plants and nature.

The plug plants are placed in the megaphones. The megaphones are designed based on the heights of different people and plants are selected based on the different megaphone growing condition. The megaphone will also protect the growth of plants, collecting sun, water, and love from people. People can talk to them, hear them, observe the growth of plants. In this playful interactive process, the relationship between people and plants are established. At a assumed three months growing period, plants will merge out from the megaphones and form pretty bouquets.

The communication is mutual. Plants can draw "nutrients" from their talk with people, simultaneously, people take this opportunity to go outside and make connection with each other, with nature, pay attention to the importance of social and natural environment.

Adult
height: 1m
radius: 0.06/0.3m

Wavy hairgrass
Deschampsia flexuosa

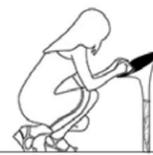

Common sneezeweed
Helenium autumnale

Virgin's Bower
Clematis virginiana

Adult
height: 0.5m
radius: 0.03/0.3m

Red baneberry
Solidago sempervirens

Teenager
height: 0.7m
radius: 0.06/0.25m

Seaside goldenrod
Solidago sempervirens

Hoary vervain
Verbena stricta

Children
height: 0.5m
radius: 0.03/0.3m

Two-leaved mitrewort
Mitella diphylla

Hairy beard-tongue
Penstemon hirsutus

Western pearly everlasting
Anaphalis margaritacea

Bunny tails
Lagurus ovatus

Children
height: 0.3m
radius: 0.03/0.25m

TALK TO ME
HEAR ME !

Talking

I will hear you.
