Playsage II : *Allez jouer dehors!* 360° na tu re

jardins de métis
reford gardens

CONCEPT

360 ° NATURE

One of the elements that cannot be played at home is *the sun*!
We invite children of all ages to *play with the reflections and light show*, to compose a new garden through mirrored cubes and colored cubes.

A landscape that recreates a 3D setting of an **8-bit** videogame with its cube pixels, an invitation to play with the most beautiful game ever: the nature!
The rigid forms of the structure will be opposed to the organic ones of the vegetation.
The mirrors will amplify the feeling of being surrounded by nature. You will notice unusual aspects of plants and trees such as, for example, the lower page of the leaves.
A look upside down! The chance of recomposing a garden, according to one's imagination, through the mirrored mobile cubes.
Come to create rainbows in the forest with colored cubes or combine colorful reflections and vegetation. Be able to give a new shade to a plant only thanks to a play of light.
An infinite range of opportunities using vegetation, sun, reflections and your own imagination!
Go out and play outside, ehy oh, let's go!!!

PLANTS

1 *berberis x ottawensis* 'superba'

2 *Ceratostigma griffithii*

3 *Crocosmia masoniorum*

4 *Chionanthus virginicus*

5 *Forsythia suspensa*

6 *Kalmia latifolia*

7 *Caragana arborescens*

8 *Cornus canadensis*

9 *Fargesia nitida*

0 *Populus tremuloides*
