

BEYOND BARRIERS

The world has spent most of 2020 behind glass. Not on display—as in a terrarium or a vitrine—but rather, intentionally separated, distanced, and isolated. For many, being ostensibly stuck in one place has heightened the desire to connect—connect with nature, connect with others, connect with anything beyond one's own thoughts. While we might not have recognized it before, the pandemic has clearly demonstrated that these interactions which we often took for granted in the past are the true magic of daily life. The magic of shared and social experiences.

Beyond Barriers celebrates the convivial and collective experience that comes from engaging with others in nature. The garden imagines a not-too-distant future where the structures that have separated us become apparatuses for interaction and interface. Imagined as a set of terraria whose enclosures have been removed—leaving only the bright cyan traces of their frames, and the idiosyncratic planting compositions contained within—the garden allows visitors the chance to experience the inside, outside and in-between of a landscape designed to bring people together after months of being kept apart.

- 1 Arctic Tundra**
Parrya arctica - Arctic False Wildflower
Eriophorum vaginatum - Tussock Cottongrass
Betula nana - Arctic Dwarf Birch
Sphagnum ssp. - Sphagnum Moss
- 2 Rocky Mountain Meadow**
Arenaria fendleri - Fendler's sandwort
Caltha leptosepala - marsh marigold
Carex scopulorum - Mountain Sedge
- 3 Limestone Barrens**
Salix jejuna - Barrens Willow
Saxifraga oppositifolia - Purple Saxifrage
Dryas integrifolia - White Mountain Avens
Erigeron hyssopifolius - Hyssopleaf Fleabane
- 4 Mixed Prairie**
Stipa comata - Common Spear Grass
Pascopyrum smithii - Western Wheat Grass
Bouteloua gracilis - Blue Grama
Anemone cylindrica - Long Fruited Anemone
- 5 Clover Mound**
Trifolium repens - White Clover
- 6 Boreal Forest Floor**
Enemion biternatum - False Rue-Anemone
Athyrium filix-femina - Lady Fern
Osmunda cinnamomea - Cinnamon Fern
Larix laricina - Tamarack
- 7 Canadian Cacti**
Coryphantha vivipara - Pincushion Cactus
Opuntia humifusa - Eastern Prickly Pear Cactus
Opuntia fragilis - Little Prickly Pear Cactus
Opuntia polyacantha - Plains Prickly Pear Cactus
- 8 Carnivores of Canada**
Pinguicula vulgaris - Common Butterwort
Sarracenia purpurea - Purple Pitcherplant
Drosera anglica - English sundew
